As a customer-oriented company, ACE AGRO CORP. has made every effort to calm its customers' minds and pave the way for achieving their goals. One of the ways of this company is to inform the clients about the current situation in the market and the forecasts through which they can continue their business with a more open mind. The report provided with a schedule every two weeks helps us in this crucial matter.

Canada's exports have been quiet for the past few weeks as global demand for lentils has fallen. This is accompanied by the important issue of container and ship shortages as well as transportation problems. The situation is such that no one is 100% responsible and confident when it comes to shipping costs.

On the other side, according to the Australian Bureau of Statistics (ABS), Australia has experienced a rise in its lentils export in October compared to September. The essential buyers for this product were Egypt, Sri Lanka and the UAE, respectively.
